

S23-B Dosing Wrapping Machine Butter Solutions

S23-B Dosing Wrapping Machine

The S23-B is a new packaging machine designed by DAKY PACK for butter portions, representing a best seller for small and medium producers worldwide.

Thanks to a long term experience, DAKY PACK has been improving the S23-B technologies following the demands of the modern market.

This machine is the best solution in terms of costs, sizes and resources needed for its use.

The paste, loaded directly into the hopper, is dosed in two paper cups at time, previously moulded, then folded "Portfolio" style.

Through the final pressing the folded cubes are pushed on the exit belt in two rows.

This machine is able to manage a wide range of cube sizes.

All our machines are provided with:

- Electrical panel in accordance with in force regulations.
- Product level control for hopper automatic feeding.
- Automatic oil lubrication of the mechanical equipment inside the machine.
- Inverter controlled main machine driver.
- Touchscreen HMI (Human Machine Interface).
- Speed control.
- Production monitoring
- Hopper cover to avoid foreign body fall in the mass.
- All part in contact with product are food grade.
- Safety guards according to CE rules.

Upon request, we can supply a COMPACT machine, mod. S23-B/C capable of forming, dosing, wrapping and cartooning.

Its small dimension makes it suitable to be allocated in tight spaces.

It's economy makes S23-B/C a best seller.

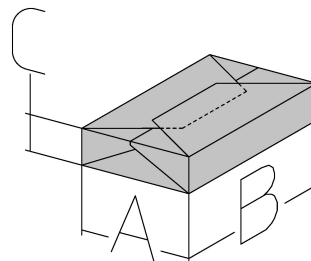

Technical Data

Production Capacity	Up to 280 portions/min.
Installed Power (Kw, V, Hz)	3Kw - 400V - 50/60Hz
Compressed Air Consumption	20 NI/min (Min. Op. Pressure 6 bar)
Vacuum Pump Flow	8 m3/h (Head: 150 mbar)
Weight	2000 kg approx.

Portion Dimensions

A (min. ÷ max.)	20 mm ÷ 30 mm
B (min. ÷ max.)	20 mm ÷ 50 mm
C (min. ÷ max.)	6 mm ÷ 25 mm
Weight	7 g ÷ 25 g
Wrapping Style	Bottom Fold.

Sizes out of range can be handled after been evaluated from technical office.
